

## 1. Biofortified Varieties

**Manjari Medika:** A juice variety which contains high amount of anthocyanin (4 to 6 g/kg), having antioxidant and anti-cancerous properties. The seed oil is rich in vitamin E (1250 – 1350 mg/kg), especially gamma-tocotrienol, which is well-known for its anti-radiation properties. The seed cake of this variety has been found rich in polyphenols, and has immense potential for use in animal feed. Yield is 25 to 40 MT/ha. Recommended for cultivation in Maharashtra, Karnataka, Punjab, Madhya Pradesh, Telangana, and Tamil Nadu.
